Minsk, Belarus

Junior Project Leader (Trainee)

Recently I was a co-owner and CEO of trading company (industrial pump equipment), but now, for different reasons, I have decided to change my life way. My nowadays passion is project management IT and all new technologies. I am good at international communications and solving the problems inside and outside the company. I haven't the relevant experience, but I'm a hard-working man and I learn quickly. Now I'm studying at GEEK BRAINS school (Moscow) as project manager student. I am looking for opportunities to develop as a project manager.
